Unix

Linux

Industry Recognition

1999 Independent Games
Festival Finalist

Credit in *Isometric Game
Programming with DirectX*
in 2001

Complimented in numerous
online reviews for software
stability and usability

Programmer / Software Analyst

Solution-oriented professional dedicated to designing and implementing software for today's technology conscious organizations.

Professional Experience

Information Systems Consultant

August, 2004 - Present

Provided short-term networking, web development, and PC support consulting to Mid-South area businesses and individuals.

Programmer / Information Systems Analyst

Professional Counseling Services, Inc.

July, 2001 – August, 2004

Administered and upgraded database processing, import and export, and the user interface for third-party software used in the daily operations of a community mental health center running on SCO OpenServer Unix. Technologies used include Visual Basic, SQL, PHP, JavaScript, and software specific scripting languages. Helped make the transition from a proprietary billing and reporting process to a HIPAA compliant EDI based procedure conforming to the ANSI 837 healthcare claim transaction set and the 997 acknowledgement transaction set. Tested and monitored these procedures to ensure the smooth operation of healthcare claims processing and state-mandated reporting through various third-party clearinghouses for TennCare, Medicare, Medicaid, and other privately run insurance companies. Supported and upgraded a WAN spanning 6 counties in West Tennessee. Set up packet filtering firewalls for blocking unwanted Internet connections to the WAN. Maintained and supported authentication and file and print sharing services on Windows NT & 2000 Server. Provided Help Desk support for Windows 95, 98, NT, 2000 and XP, Microsoft Office, and a web based data entry and retrieval user interface.

Programmer / Software Designer

Nothing Special Productions, LLC

April, 1998 – June, 2001

Lead the development of 4 PC entertainment software projects created using Microsoft Visual C++ 6 and Visual SourceSafe. Technologies used include the Win32 API, DirectX, and Visual C++ profiling and debugging. Handled software design and business management issues.

PC Support Supervisor / Mentor

Stream, International

November, 1997 – March, 1998

Provided second-level phone technical support for a major PC manufacturer. Supported hardware, numerous prepackaged applications, and Windows 95/98. Handled escalation calls and supervisory duties including, but not limited to, shift productivity reporting and improvement and call time reduction.
